## 2410

### StealthLite Recoil LED

[Click Here & Go To Pelican](#)

### StealthLite™ 2410 Recoil LED™

Same features as the StealthLite 2400 but with the Recoil LED module that produces a true, bright collimated LED beam. The 2410 is corrosion proof, resistant to extreme temperatures, and submersible to 500 feet. It is powered by 4 AA alkaline cells (included). For hands-free operation, attach it to your hard hat with our optional helmet light holder.

## 3600

Little Ed

[Click Here & Go To Pelican](#)

### Little Ed™ 3600

Don't be fooled by the name. This right angle light packs a punch. The 3600 is made of ABS resin that's extremely strong, light weight, corrosion proof, and resistant to extreme temperatures. The super bright Xenon beam cuts through thick smoke and dust and the one-handed switch is easy to operate, even with gloves. For hands-free use, a stainless steel clip is built in. Attach the Little Ed to your turnout coat or work shirt. It is powered by 4 AA alkaline cells (included).

## 3610

### Little Ed Recoil LED

[Click Here & Go To Pelican](#)

#### Little Ed™ 3610 Recoil LED™

Same as the 3600 but outfitted with our Recoil LED module. The 3610 uses a 1 watt LED that's aimed backwards into the reflector. 100% of the light is captured and aimed forward as a tight collimated beam that's as bright as an incandescent. The body is made of tough ABS resin that's corrosion proof and resistant to extreme temperatures. It is powered by 4 AA alkaline cells (included).

## 3650

Little Ed Rechargeable

Click Here & Go To Pelican

### Little Ed™ Rechargeable 3650

Same as the 3600 but in a rechargeable version. The 3650 provides a consistently bright Xenon beam after every charge. The charger base unit can be installed at home or work using the 110V transformer. Or in a vehicle through direct wiring or 12V plug-in adapter. It comes with a long-life rechargeable NiMH battery pack.

### Big Ed™ 3700 Photoluminescent

Same as the 3700 but outfitted with a lens ring that emits a bright glow in the dark. The new generation photoluminescent material in the plastic absorbs the energy from any light source - fluorescent lights, the sun, or even the flashlight's own beam. No more fumbling in the dark for your flashlight. The Big Ed 3700PL is powered by 4 C alkaline cells.

## Big D™ 3800

The Big D was designed with two things in mind: heavy duty and light weight. The 3800 is 50% lighter than the competition but uses a hi-intensity Xenon lamp to produce the brightest beam that can cut through thick smoke and dust. For emergencies, a back-up lamp is included. Lay it flat or stand upright and aim the light where you need it, thanks to the pivoting head that rotates almost 180°.

The main body is ABS resin that's corrosion proof, highly resistant to chemicals and extreme temperatures, and just plain tough. A stainless steel grill protects the lens from scratches, debris, and hard knocks. The 3800 comes with dual push button switches for constant on or flashing strobe. Also, a quick change battery pack makes replacement easy, with a steel clip to hold it securely. It comes with a heavy duty strap and a mounting base that can be installed horizontally or upright. The quick release design of the base allows you to remove the Big D with one hand. Powered by 6 D alkaline cells.
