FIRE WALKER

Ranger FireWalkers 5123

Shoe-Fit™ FireWalkers Outstanding Fit & Comfort NFPA Compliant

Works like a boot.

RANGER Shoe-Fit are the first and only fireboots constructed exclusively on shoe lasts. Only true Shoe-Fit contouring allows the foot to slip freely in and out. You can jump into a RANGER Shoe-Fit style as easily as our traditional fireboots.

Fits like a shoe.

Once the boot is on, you feel the difference immediately. RANGER Shoe-Fit contouring snugs the heel, the instep, the toe, and the ball of the foot into form-fitting pockets of support and comfort. It feels just like a shoe.

5123
16" SHOE-FIT™ BUNKER

Insulated.
Wool felt midsole.
KEVLAR® NOMEX® linings.
Built-in metatarsal foot guard.
Built-in cushion shin protection.

Style 3007

Style 3007 (10") have genuine sloped side seams with one piece back stay/pull tab/outside counter pocket, and water repellent, polishable leather. Fire suppression personnel will appreciate safety features such as electrical hazard rated soles, safety toes, bottom penetration resistance barrier, steel shank and quick donning and doffing features. See below for specific details on the construction and materials in these boots.

- Waterproof/Breathable CROSSTECH® Footwear fabric bootie system with Cambrelle®, a highly absorbent lining that will not support the growth of bacteria.
- Comfortable and flexible American top binding is ultra soft so you'll never have undue chafing on your calves.
- Kevlar® Aramid/Nomex® panels and gusset for fire retardancy and improved breathability.
- Sloped side seam and wraparound back stay/counter pocket put more support in the ankle area where it is needed most.
- Top Grade Military AB water resistant leather for outstanding durability and comfort.
- Slip resistant tread design and exclusive sole compound provide outstanding abrasion, thermal and chemical-resistant properties.
- Double stitched reinforced soles.
- Dual function closure system for enhanced ankle support and fit plus zipper for rapid donning and doffing.
- Oblique shaped safety toe matches the natural contour of the foot for greater comfort.
- Re-enforced scuff-resistant toe.
- Corrosion resistant steel ladder shank and stainless steel, puncture resistant bottom plate.
- Available in over 100 sizes.
- Exceeds NFPA 1971, 2000 edition.

Style 5000

14" high pull-on, fabric/leather bunker style boots with patented 2" slope Powerback for added comfort in rear knee area. Side and back stays, fireresistant fabric, water-repellent leather, safety toes, electrical hazard rated soles, bottom penetration resistance barrier, steel shank, shinguard and quick donning and doffing features for fire suppression personnel.

- NEW PowerComfort™ Insert - Exclusive patented fabric liner keeps moisture trapped in insert when your boots are on, evaporates when your boots are off. Controls bacteria and foot odor. Keeps your feet cool and comfortable. Special copolymer agent absorbs 160 times its own weight in moisture. No more hot, damp boots. Available only in PRO boots.
- NEW PowerBack - Exclusive patented cut-away feature prevents boots from cutting into back part of knees. No more discomfort and chafing when crawling or bending. Innovative design reduces weight and firefighter stress and fatigue.
- Shinguard - Extended shin guard with leather covering for maximum comfort and protection when climbing ladders.
- NEW PowerConstruction™ - Fabric upper of Kevlar / Nomex 40/60 blend reduces weight and fatigue while increasing breathability and fire ground performance. Weighs less than 5 lbs.
- Cambrelle® Liner - The BEST abrasion resistant fabric lining on the market. Rapid moisture release technology offers excellent moisture wicking capabilities. Quilted and laminated to 7.5 oz Kevlar® felt thermal barrier and full height CROSSTECH® footwear fabric bootie. CROSSTECH® provides superior liquid penetration resistance to blood, body fluids and NFPA common chemicals. This bootie package is only available in PRO boots.
- Backpart Molded Heel Counter - Thermoplastic backpart molded heel counter ensures superior comfort, fit and durability. Will not lose its shape if exposed to moisture.
- Full Wrap-Around Goodyear Welt - Adds support, reduces fatigue and ankle sprains/strains. Will retain its shape over the life of the boot so you keep that great fit.
- Ladder Shank - Corrosion resistant steel ladder shank and stainless steel, full length, toe-to-heel, puncture resistant bottom plate.
- NEW PowerGrip™ Sole - Angled lugs provide substantial edging and gripping capabilities. Center medallion of stars surrounded by lug pattern provides maximum wear and traction.
- NEW Unparalleled PowerToe Durability - exclusive patented toe cap protection made of fire resistant / abrasion resistant FR compound rubber with three horizontally extended toe cleats. Cleats function as durability bumpers for unsurpassed toe abrasion protection when crawling through structures and traction enhancement when crawling on treacherous surfaces.
