STRUCTURAL

For over 20 years, Morning Pride has developed and provided leading edge technology in fire helmets, culminating in the next generation "Plus Series" of Ben Franklin and Lite Force helmets. For Structural Firefighting Operations, our traditional "Ben 2 Plus" and modern "Lite Force Plus" both offer you the most advanced "FYR-Glass" shell technology. They feature improved internal components, better fit and ride, a full choice of NFPA 1971 (2000 edition) and/or OSHA compliant eye protection systems, and dozens of custom options

EMS/USAR/Wildland

The new EMS helmet is for Emergency Medical Operations only, as this product uses a Poly-Med type shell that does not offer added thermal resistance like the other materials. This helmet is ultra lightweight, extremely affordable and able to provide ANSI Class 1 head protection.

For Technical Rescue Operations, our USAR offering covers all the bases. The NFPA 1951 (2001 edition) compliant Heavy Duty Technical Rescue/USAR helmet is based on our Plus technology. It offers slimmer profiling for maneuvering in tighter spaces.

For Wildland Firefighting Operations, the new Wild-FYR Standard Brim and Full Brim helmets meet NFPA 1977 (1998 edition). Both use our specially selected Thermo-FYR shells and are available with ear and eye protection for use when operating chainsaws. The Wild-FYR is based on proven ANSI Class 1 hard hat technology.
