

INTRODUCING!

EZ FOAM™

QW Spec # 25-08-1550

By ROSENBAUER

Easiest Maintenance Free Operation

- No priming pump necessary
- No drive engine for the foam pump
- No electric necessary

Easiest Foam Proportioning per Outlet

- The EZ Foam™ is a water driven double-piston pump with venturi proportioners on the outlets. Three foam rates can be chosen per outlet.
- 1/2%, 1%, 3% for Normal Pressure - 1%, 3%, 6% for High Pressure
The Foam pump regulates itself - The right amount of foam concentrate is supplied all the time.
- This easy direct-foam-injection system is available for normal and high pressure pumping systems.

Advantages

- Individual adjustment of foam rate per outlet
- Possibility to extinguish with foam and cool with water at same time
- System is available for normal and high pressure pumps
- No foam concentrate in water pump
- External suction possible
- Cost effective
