SPOT LIGHT

BREAKER BOX OPTION BY ROSENBAUER

SPECIFICATION: The breaker box shall be recessed into the side wall of the compartment which shall allow for increased protection of the breaker box. For increased safety, all wires entering and exiting the breaker box shall be behind the compartment wall and not be visible from within the compartment. There shall be access panels above and below the breaker box that shall be easily removable to allow for serviceability of the breaker box. The breaker box and individual breakers shall be labeled using durable adhesive screen printed labels. Due to high wear, labels that are hand written or computer printed shall not be acceptable.
