### ELECTRIC CANOPY AWNING

DESCRIPTION: Canopy Awning - Electric

PLANT: Rosenbauer

SPECIFICATION: A side body awning shall be \_\_\_ feet long x 10 feet wide and shall be installed on the side of the body. The awning shall be attached securely to the upper body and shall be located above the compartment doors.

The canopy shall be made from acrylic fabric that resists rotting, cracking, peeling and mildew. The awning shall be a power operated design and system, and shall be easily extended and retracted with switches located at the rear of the body.

The wraparound slatted metal awning enclosure protects the awning in transit and automatically opens or closes with the awning. The enclosed design shall minimize dirt and grime from entering through exposed arms. Stainless steel nuts, washers, screws and other hardware shall be utilized in installation.
