AKRON FIREFOX MONITORS

[Akron FireFox Monitor in action.](#)

The Akron FireFox monitor is a great option to allow pumping and rolling in an approved form of seated, belted and in an approved chassis cab. The Firefox has a panel or remote mounted Joystick controller. The standard electric control water supply valve allows the flow of water from the PTO driven fire pump to be turned on and off from the cab seated position. The nozzle is adjustably controlled from straight stream to fog spray from as low as 30 GPM to as high as 500 GPM of water flow.
